

Xzilon Exterior Dry Application Instructions

Exterior Protect Application Instructions wipe on

1. Start with a clean prepped Vehicle.
 - We are assuming you are starting with a clean, prepped Vehicle.
 - To get to a clean prepped Vehicle: If it has rail dust – dust particles embedded in the paint from the factory, use a clay mitt available on Amazon or at your local detailing shop.
 - Wash with a good soap.
 - Make an extra rich batch of soapy water in a 5-gallon bucket. Dip hand with mitt in water rub over Vehicle, follow with bare hand to make sure it stays smooth. This will remove any oxidation, rail dust and imperfections in the paint.

Application:

1. Exterior Protect can be applied by spraying onto vehicle surface directly or by rubbing on with applicator. Spread product onto a section of the vehicle surface, let it sit for one minute, then buff off with microfiber towel. Repeat until all sections are complete for a luxurious shine and superior protection.
